+1 +2 +3 +4 +5 +6 +7 +8 +9 +10 -10 -9 -8 -7 -6 -5 -4 -3 -2 -1 Color Key for Stepwise Deviation from Modal

****A value of ??for any marker indicates that the lab reported a null value or no result for this marker.**

All cases of this nature are retested multiple times by the lab to confirm their accuracy. Mutations causing null values are infrequent, but are passed on to offspring just like other mutations, so related male lineages such as a father and son would likely share any null values.

The page display above was inspired by Jason Cleary who devised a colorization scheme to make observation of the differences between samples easy and efficient.?He graciously supplied Family Tree DNA his colorization code which was modified in house to support our sub grouping system.
Family Tree DNA thanks Jason for the time he spent pioneering this system for the benefit of our group administrators and project members.
